Safety Ratings ⓘ

National Highway Traffic Safety Administration (NHTSA) crash test scores

NHTSA 5-Star Safety Ratings

The National Highway Traffic Safety Administration (NHTSA) conducts unbiased crash tests of new vehicles to determine how safe they are. The more stars, the safer a vehicle is.

NO OVERALL SAFETY RATING

OVERALL FRONTAL CRASH (Not Rated)

OVERALL SIDE CRASH (Not Rated)

Frontal Barrier Ratings

DRIVER SIDE

PASSENGER SIDE

The frontal barrier test simulates a head-on collision between two similar vehicles. The test vehicle is crashed into a flat, rigid barrier at 35 mph.

Side Barrier Ratings

DRIVER SIDE

PASSENGER SIDE

The side barrier test simulates an intersection collision between two vehicles. A moving non-rigid barrier, angled at 27 degrees.

ROLLOVER RESISTANCE

The rollover resistance test measures the risk of rollover in a single-vehicle, loss-of-control scenario.

Disclaimer: This report does not contain detailed information regarding a vehicle's repair history nor information on all motor vehicles in the United States because some states are not yet providing their vehicle data to the system. Currently, the data provided by states is provided in a variety of time frames; while some states report and update data in "real-time" (as title transactions occur), other states send updates less frequently. Owner information may not be fully updated or accurate in all instances.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company to be a "total loss" or branded by a state titling agency. A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, users are strongly encouraged to also obtain an independent vehicle inspection to ensure the vehicle does not have hidden damage.

It may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.

Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.

The information used to compile this report is aggregated from various government agencies, non-profit organizations, and industry sources. The accuracy and reliability of the information supplied depends primarily on the reporting sources, and all entities involved in compiling this report accept no liability for any errors or omissions.
